## ABOUT ME

Family man, I enjoy runs outside, playing boardgames and pinball machines. I also like to keep my brain entertained with programming books and philosophy podcasts. I will gladly have a chat about those topics!

## SKILLS

React  
Next.js  
TypeScript  
HTML5  
CSS  
Node.js  
SQL  
C#  
Rust  
Git  
Azur DevOps

## EDUCATION

### **Certificate, Software Engineering**

*Thinkful (bootcamp), 2020*

Web development with a strong focus on modern best practices, accessibility and design.

Practical mastery of JavaScript, HTML, CSS, React, Node and Postgres.

“ I like building tools and systems: Helping people focus on the parts of their jobs they love. ”

# Hello! I'm MARCUS CONNOLLY

Software developer

## WORK EXPERIENCES

*Full-Stack developer proficient in React, TypeScript/JavaScript, Node.js and SQL. As a former figure skating coach, I understand the process of taking complex skills/systems and breaking them down into manageable pieces.*

### **Software developer**

*Fix Network World, 2020-Present*

- Developed and architected a multi-tenant Next.js application serving as the central hub for internal operations, enhancing efficiency and collaboration within the company.
- Implemented various full stack features, from the interface all the way to the database.
- Designed and implemented integrations between modern and legacy systems, ensuring a seamless transition for the end user.
- Collaborated in an Agile framework, emphasizing effective communication, to deliver high quality software solutions.

### **Figure Skating coaching**

*Independent coach, 2006-2020*

- Managed and coached competitive and recreational skaters as an independent coach.
- Led training of Program Assistants.
- Led seminars across Central and Eastern Canada.
- Developed an automated billing system for coaches.
- Implemented a system to track the development and evaluation of skaters in the CanSkate program.
